INNOVATIVE SOLUTIONS FOR CRITICAL MISSIONS

We Are Constantly Searching For Information, Knowledge, And Wisdom

On average, people spend 33-35% of their time searching for the proper knowledge they need to perform their duties. If people could find information just 25% faster, they could spend 25% more time on other tasks. In monetary terms, that 25% search time reduction could represent millions in savings over time depending on the size of your organization.

As your organization evolves, managing large volumes of data can quickly become an obstacle to answering mission-critical questions. INCATech aids you in organizing and managing the data in your enterprise so everyone can take data-driven actions.

We Do The Heavy Lifting, So You Can Focus On The Mission

Our search solutions store, retrieve, and manage your structured, semi-structured, and unstructured data using User-Centered Design best practices and future-leaning technologies like A.I. and Machine Learning. Natively embed Enterprise Search in your systems & apps so you can benefit from having current, accurate information securely and persistently provided in your workflows.

USER-CENTERED DESIGN

Tailored search aligned to user needs and business goals

DOMAIN & MISSION

On-demand data and content visualized for your mission

WORKFLOWS & BUSINESS PROCESSES

Build Search natively into your apps & workflows to power business processes

INNOVATIVE SOLUTIONS FOR CRITICAL MISSIONS

Find Answers When You Need Them

Our solution stack is a flexible framework that incorporates your content, its metadata, indices and search built on Solr, Elasticsearch, Coveo, Lucidworks, and other major technologies in the industry.

We've Helped Organizations Implement Search To...

- Manage a variety of data types across distributed databases, portals, content management systems, and other sources to support American personnel recovery missions.
- Maintain over 600,000 historical artifacts, and millions of historical documents, that Government staff use to research and write official military histories.
- Organize an assortment of content types to power the most heavily trafficked public websites at Department of State, <https://travel.state.gov>.
- Transform how data is managed, shared, and leveraged to promote next-generation open data, use of content delivery networks, content management systems, common code

Does any of this resonate with you? Contact us at (703) 391-1600 or email us at Solutions@incatech-corp.com to discuss how we can help with Enterprise Search.
