

INNOVATIVE SOLUTIONS FOR CRITICAL MISSIONS

Engaging content requires a capable system which is why INCA Tech builds content management systems using best-of-breed technologies. Our experienced engineers deliver editors with seamless workflows that put content creators closer to their work.

Platform Capabilities

INCA Tech's business automation processes enable the development of state-of-the-art architecture and technology solutions. Content management design and development services include Drupal, WordPress, Adobe CQ5/Adobe Experience Manager and SharePoint sites. INCA Tech's history of success stories includes clients such as the U.S. Department of State and Federal Aviation Administration. INCA Tech has a proven track record of delivering legacy and greenfield CMS platforms that scale and perform with customers' needs.

System Integration

Whether it's an upgrade from legacy SharePoint or a Solr-powered search for Adobe's Marketing Cloud, INCA Tech's engineers deliver working end-to-end solutions. Our engineers have experience combining complex systems while ensuring data governance requirements are met, so you can rest easy that your users' data is secure.

Long Term Partnership

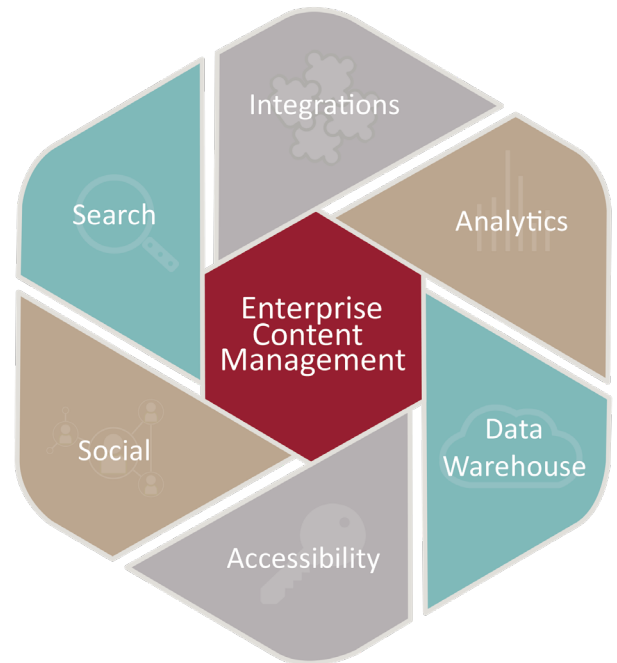

INCA Tech believes in empowering partners for self-sufficiency by providing comprehensive architectural and operational documentation. Whether you need author and administrator training, website hosting, or ongoing operations support and maintenance, INCA Tech's managed services team is here to help.

INNOVATIVE SOLUTIONS FOR CRITICAL MISSIONS

Enterprise Content Management (ECM) Capabilities

- Content management design and development services include Drupal, WordPress, Adobe Experience Manager and SharePoint sites.
- Experienced engineers deliver editors with seamless workflows that put content creators closer to their work.
- Proven track record of delivering legacy and greenfield CMS platforms that scale and perform with customers' needs.
- Business automation processes enable the development of state-of-the-art architecture and technology solutions such as Remote Sensing / Imagery Expertise.

ECM with Adobe Experience Manager

- Created customized Adobe Experience Manager components to meet our client's needs and designed and developed new content.
- Adobe Experience Manager integration with embedded custom dynamic Esri based mapping for use by embassies, consulates, information, and travel advisories.
- Provides excellent Adobe Experience Manager operations and maintenance functions for our customers, including server administration, user support, and training.
- Expertise in Adobe Experience Manager solutions and migrating legacy content into Adobe Experience Manager.
- Expert skill sets working with Adobe Experience Manager allows us to provide quality service to our government clients, and allows our clients to quickly provide up-to-date, complete and correct information to the end-user community.
- Custom alert banner component allows the Adobe Experience Manager authors to get critical information to the end-user community quickly and easily.
